## Shower Door of Canada

### SHOWER DOOR OF CANADA MAINTAINING THE INVISIBLE SHIELD® PROTECTION SYSTEM

Protected glass results in the reduction of hard water minerals, limescale and build-up for easier cleaning and maintenance and an overall, improved appearance.

In order to effectively maintain the Invisible Shield protection the following process is recommended:

**Daily:** Use a **soft towel** to dry the glass surface following use. **Note: Daily use of a squeegee can be abrasive and is not recommended**, as it will accelerate the wear of the protection. Occasional use of a squeegee is perfectly fine.  
(Failure to perform basic maintenance could result in water spots on glass)

**Weekly:** Apply **Repel® Glass and Surface Cleaner** to maintain the strength and integrity of the nano-shield barrier. The Repel refurbishes the Invisible Shield protective coating and keeps the glass looking great for years

A complimentary bottle of Repel Glass and Surface Cleaner has been provided.  
**Repel Glass and Surface Cleaner** can be purchased at our showroom for \$ 9.95.

**Bi-Annually:** Invisible Shield Glass Protector is available in a 4oz bottle and can be reapplied twice yearly to extend the lifetime of the factory applied nano-shield barrier.

**Warning: Do not use abrasive or harsh cleaners on your shower glass.**  
**ALWAYS USE** a clean soft cloth, pad or paper towel to clean the glass.

**Invisible Shield is a durable coating. With regular treated surface maintenance your glass protection will last a lifetime**
